

A Message from Mike-the-Locksmith

The purpose of life is to give it away. –William Shakespeare

Dear Readers,

April is here! Time to thaw from the Winter and to plan Spring projects. Whether you need your new home or business re-keyed (same locks, new set of keys) or you're looking for locks which integrate technology, at Mike's Locksmith, we're here to help. As always, our estimates are FREE of charge and our pricing is UPFRONT.

Bluetooth Enabled Locks Simplify Access and Provide Insight.

Recent advances in technology have now made a variety of Bluetooth locks available at an affordable price-point. These locks share a number of features previously available only in expensive, commercial-use locking mechanisms.

- Know whether your lock has been tampered with
- Know whether the battery is low
- Obtain an audit trail
- Send a virtual key

If you're a **Real Estate Agent**, Bluetooth lock-boxes make your life easier by allowing you to open with your phone and to send a virtual key, should someone want to show your property. You'll also know exactly how many times the property was accessed. No more guessing or collecting left-behind business-cards.

If you have a **remote property or a weekend getaway**, a Bluetooth padlock will put control in the palm of your hand, so you can protect what matters most in your life. Unlock your padlock, share access with guests, and monitor activity - all with one easy-to-use app.

If you're a **frequent traveler**, the [AirBolt](#) is perfect for you. The AirBolt is weather resistant, and provides location tracking and proximity alerts, in addition to the features above.
